

**NEW!**

# Forward-Mode Transformers

For 30 Watt  
Telecommunications

- Designed to meet 30 W PoE objectives of IEEE 802.3at.
- Operates at 250 kHz with 36 – 72 Volts input
- 1500 Vrms isolation, primary and bias to the secondary
- Bias winding output: 12 V; sync winding output: 5 V

**Core material** Ferrite

**Terminations** RoHS tin-silver over tin over nickel over phos bronze. Other terminations available at additional cost.

**Weight** 10.1 – 10.7 g

**Ambient temperature** –40°C to +125°C

**Storage temperature** Component: –40°C to +125°C.  
Packaging: –55°C to +80°C

**Resistance to soldering heat** Max three 40 second reflows at +260°C, parts cooled to room temperature between cycles

**Moisture Sensitivity Level (MSL)** 1 (unlimited floor life at <30°C / 85% relative humidity)

**Mean Time Between Failures (MTBF)** 26,315,789 hours

**Packaging** 175 per 13" reel Plastic tape: 44 mm wide, 0.4 mm thick, 32 mm pocket spacing, 12.0 mm pocket depth

**PCB washing** Only pure water or alcohol recommended

1. When ordering, please specify **termination** and **packaging** codes:

FCT1-240D3SL D

**Termination:** L = RoHS tin-silver over tin over nickel over phos bronze.  
Special order: T = RoHS tin-silver-copper (95.5/4/0.5)  
or S = non-RoHS tin-lead (63/37).

**Packaging:** D = 13" machine-ready reel. EIA-481 embossed plastic tape (175 parts per full reel).

B = Less than full reel. In tape, but not machine ready. To have a leader and trailer added (\$25 charge), use code letter D instead.

- Inductance is measured at 250 kHz, 0.2 Vrms, 0 Adc.
- DCR for the primary and secondary is with the windings connected in parallel.
- Leakage inductance is for the primary windings with the secondary windings shorted.
- Turns ratio is with the primary windings and the secondary windings connected in parallel.
- These inductors are recommended for 30% ripple current. Ripple less than 30% may require the use of physically larger inductors. Allowing higher ripple current to make use of smaller inductors may create a risk of discontinuous output current.
- Operating temperature range –40°C to +125°C.
- Electrical specifications at 25°C.

The primary windings and the secondary windings are to be connected in parallel on the PCB board.
